*Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1-3, 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin.

Lin discloses a projection apparatus comprising:

an image forming element (7 or 9) for forming an image by modulating incident light;

an illumination optical system (5) for illuminating the element with light from a light source (1);

Lens elements (5a, 5b) are relatively movable so as to vary a light intensity distribution. (Column 2 Line 53- Column 3 Line 6) The brightness of a center portion of the modulator is either strong or decreased.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin in view of.

Lin discloses a projection apparatus for varying illumination distribution on a light modulator but does not teach using such a lens system in an arrangement with plural modulators.

Ogawa et al. teach the use of movable lens member preceding an optical arrangement with plural light modulators.

It would have been obvious to one skilled in the art at the time of the invention to modify the lens arrangement shown by Lin for use in other optical arrangement, such as one shown by Ogawa et al., in order to provide intensity variance in multiple modulator systems. Note that it is the lens arrangement application which is being modified, thus the fact that Lin shows a color filter does not negate the combination. Sequential color filter and dichroic separation are both well known means of forming color images.

***Allowable Subject Matter***

4. Claims 4-10, 13-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 25-58 are allowed.
